List of Figures and Tables	xi
Preface	xiii
Part I	
1. Circular economy strategies and approaches	3
<i>Pietro De Giovanni</i>	
1.1. Circular economy and the waste cascade	3
1.2. The “Reduction” principle	5
1.3. The “Reuse” principle for materials	7
1.4. The “Reuse” principle for goods	10
1.5. The “Recycling” principle	12
1.6. Alternative options to the circular economy	19
2. Circular networks and engagement strategies	25
<i>Pietro De Giovanni</i>	
2.1. Network creation in a circular economy	25
2.2. Creating circular networks with consumer engagement	28
2.3. Circular networks and consumers’ strategic behaviors	31
2.4. Creating circular networks by collector engagement	35
3. Circular economy through public interventions	43
<i>Pietro De Giovanni</i>	
3.1. Review of public incentives to support circular economy systems	43
3.2. End-of-waste mechanism	45
3.3. Make standards more circular	45

	<i>page</i>
3.4. Ban products when more circular alternatives exist	46
3.5. Promote the social economy through activities fostering the circular economy	46
3.6. Increase the guarantee period	47
3.7. Favor R&D support for integrated value-chain projects and investment in new circular activities	47
3.8. Set up green deals and clusters at different levels	48
3.9. Favor environmental labeling and certification	48
3.10. Communication about the repair of products	49
3.11. Material taxation	49
3.12. Modulation of EPR fees	50
3.13. EPR: Adapting contract duration and conditions	51
3.14. Green public procurement: Apply environmental (circularity) criteria (global environmental performance, recycled content, long life)	52
3.15. Mandatory recycled content	52
3.16. Landfill and incineration ban/tax	53
3.17. Waste producers pay the full waste management cost	53
3.18. Lower VAT on green products and services	54
3.19. Addressing waste exports from the EU	54
3.20. Tradable recycling credits schemes	55
3.21. Subsidies	55
4. Value creation and capture in the circular economy	63
<i>Pietro De Giovanni</i>	
4.1. Value identification and capture through consumers' responsible behaviors	63
4.2. Value creation and conservation through circular design	67
4.3. Unlocking circular economy value through blockchain	71
4.4. New strategies for value creation in the circular economy	77
5. The smart circular economy	85
<i>Pietro De Giovanni</i>	
5.1. Responsible digitalization through a smart circular economy	85
5.2. A smart circular economy through responsible digitalization	86
5.3. A smart circular economy through Industry 4.0	89
5.4. A smart circular economy through reverse omnichannel strategies	91
5.5. A smart circular economy through smart cities	93

Part II**1. Circular green districts 99***Pierroberto Folgiero*

- | | | |
|--------|---|-----|
| 1.1. | Defining Green Circular Districts | 99 |
| 1.2. | Green Circular Districts as enablers of energy transition | 102 |
| 1.3. | Technology adoption in Green Circular Districts | 104 |
| 1.4. | Identification of secure feedstocks and final product markets | 108 |
| 1.4.1. | Potential feedstocks of a Green Circular District | 108 |
| 1.4.2. | Final product markets | 108 |
| 1.5. | The economic feasibility of a Green Circular District | 113 |
| 1.6. | Concluding remarks | 114 |

Part III**1. The circular economy in Dell Reconnect 119***Pietro De Giovanni*

- | | | |
|------|---|-----|
| 1.1. | The e-waste framework | 119 |
| 1.2. | The Dell Reconnect program | 121 |
| 1.3. | Dell Reconnect and the waste cascade | 121 |
| 1.4. | Users' engagement strategy for Dell Reconnect | 122 |
| 1.5. | Emerging strategic consumer clusters | 124 |
| 1.6. | Circular economy coordination in Dell Reconnect | 125 |
| 1.7. | Public funds available for the Dell Reconnect program | 126 |
| 1.8. | Smart circular economy in Dell Reconnect | 127 |

2. NextChem's Green Circular District Model 129*Pierroberto Folgiero*

- | | | |
|------|--|-----|
| 1.1. | NextChem's Green Circular District Model | 129 |
| 1.2. | NextChem's technology in Green Circular District | 130 |
| 1.3. | Chemical Recycling | 132 |
| 1.4. | Process Description | 132 |
| 1.5. | Circular hydrogen | 135 |
| 1.6. | Circular methanol | 137 |
| 1.7. | Circular ethanol | 138 |
| 1.8. | Waste to Chemicals vs Incineration | 139 |
| 1.9. | Green hydrogen production by electrolysis | 140 |
