Introduction 1

1.

Emerging technologies in accounting 5

2.

Peculiar and established theories framing studies of big data analytics in accounting 9

2.1. Introduction 9
2.2. Accounting information systems and technology: traditional and innovative theoretical perspectives 11
2.3. Methodology, analysis and results 17
2.4. Established theoretical frameworks applied to BDA development in accounting studies 35
2.5. Concluding remarks 40

3.

Data regulations in the European Union 43

3.1. Introduction 43
3.2. General Data Protection Regulation (GDPR) 45
3.2.1. General overview 45

3.2.2. Data processing principles 48
3.2.3. Rights of data subjects 50
3.2.4. GDPR compliance obligations 53
3.2.4.1. Consent-based data processing 53
3.2.4.2. Data protection by design and by default 54
3.2.4.3. Data breach disclosure 56
3.2.4.4. Appointing Data Protection Officer (DPO) 57
3.2.4.5. Data protection impact assessment (DPIA) 57
3.2.5. Analysis and critique 58
3.3. Digital Services Act (DSA) 60
3.3.1. Background 60
3.3.2. General overview 60
3.3.3. Analysis and critique 66
3.4. Digital Markets Act (DMA) 67
3.4.1. Background 67
3.4.2. General overview 68
3.4.3. Analysis and Critique 73
3.5. Data Governance Act (DGA) 75
3.5.1. Background 75
3.5.2. General overview 76
3.5.3. Analysis and critique 79
3.6. Data Act 80
3.6.1. Background 80
3.6.2. General overview 80
3.6.3. Analysis and critique 83
3.7. Artificial Intelligence Act (AI Act or AIA) 83
3.7.1. Background 83
3.7.2. General overview 84
3.7.3. Analysis and Critique 85
3.8. Concluding remarks 88

4.

Assessing the value of big data and analytics: issues, opportunities and challenges 91

4.1. Introduction 91
4.2. Data as a valuable commodity 93
4.3. Information valued more than data 95

pag.

4.4. Information as intangibles to be valued in financial statements 98
4.5. Concluding remarks 102

Conclusion 103
